

Native American Students

Arizona State University, College of Education. Center for Indian Education.
<http://coe.asu.edu/cie>.

The Center for Indian Education's Web site describes several model programs for teaching Native American students, as well as links to sites on the training of Native American teachers. Librarians will find its link to the online *Journal of American Indian Education*, published since 1961, and its list of dissertations on teaching Native American students most helpful. The site also includes links to other Web resources on Native American education and the Wassaja Education listserv, which focuses on Arizona tribal communities.

Carney, Cary Michael. *Native American Higher Education in the United States*. New Brunswick, NJ: Transaction Publishers, 1999.

A study of the historical development of higher education for Native Americans, this work surveys the Colonial Period to the late 20th Century. It is an excellent resource for those interested in historical perspective and background on Native American education.

Gilliland, Hap. *Teaching the Native American*. Iowa: Kendall Hunt Publishing, 1999. *Teaching the Native American* is an edited book that addresses the issue of culturally relevant education for the Native American student. Gilliland and the other authors explore such topics as the differences between White and Native American societies, and how those differences affect the learning process. The first nine chapters, written exclusively by Gilliland, address such topics as learning styles and the importance of parental involvement. In the second half of the book, guest authors get more specific with chapters on teaching social studies, creative writing, and science to Native students.

Hale, Lorraine. *Native American Education: A Reference Handbook*. Denver, Colorado: ABC-CLIO, 2002.

Part of the ABC-CLIO "Contemporary Education Issues" reference book series. This book presents a broad history of Native American Education including chapters covering legal and historical American Indian education policies.

Lindsey, Martha Ann. *A Constructivist Study of Developing Curriculum to Teach Internet Information Literacy to Navajo High School Students*. Master's thesis: Prescott College, 2000. <http://www.u.arizona.edu/~mlindsey/thesis.pdf>.

Lindsey, who for three years was a librarian at Red Mesa High School, reports results of a year-long (1999-2000) study examining the development of a curriculum for teaching Internet information literacy to Navajo/Diné high school students. Lessons were constructed through observation of student responses and formal discussions with teachers over the course of the project. The three phases of the study focused on (1) identification of effective content and delivery modalities, (2) implementing the findings of phase 1, and (3) administering a student self-assessment. Lindsey establishes eight principles for teaching Navajo students.

NativeWiki. <http://www.nativeweb.org>.

This comprehensive site is a portal to thousands of resources about "indigenous cultures around the World." Under "Resource Center," there is a list of links to education resources. These links include resources for teaching about Native American culture, as well as resources for teaching Native Americans in the classroom.

Sanchez, Irene M. "Motivating and Maximizing Learning in Minority Classrooms." *New Directions for Community Colleges* no. 28 (2000): 35-44.

In this article, Sanchez suggests that the learning styles of minority students, namely Hispanic and Native American students, have been largely ignored in the classroom. Sanchez offers a summary of learning styles and suggests ways in which these can be

used to inform course design and encourage student success. Sanchez also suggests that because educators of minority students often have low expectations, minority students suffer the consequences of low achievement and high dropout rates.

NOTE: This article is also listed in the Hispanic section of this bibliography

Swisher, Karen Gayton, and John Tippeconnic. *Research to Support Improved Practice in Indian Education*. Charleston, WV: ERIC Clearinghouse on Rural Education and Small Schools, 1999. ERIC, ED 427915.

This paper stresses the need for research on Native American education and suggests areas for further study, including the relationship between Native American students and teachers; collaborative efforts between K-12 and higher education; distance learning; culturally appropriate programs; and articulation agreements between schools.

Tippeconnic Fox, Mary Jo, Shelly C. Lowe, and George S. McClellan, eds. *New Directions for Student Services*, no 109. San Francisco: Jossey-Bass, 2005.

This issue is designated to increase the understanding of American Indian student experiences in higher education. The topics covered include student retention, student and faculty experiences, and student services.

WWW Virtual Library: American Indians. <http://www.hanksville.org/NAresources/>.

This comprehensive site links to hundreds of Native American organizations and cultural sites. The section Education includes a "Teachers Resources" link which provides a number of resources on classroom practices.
