

**[www.reservesdirect.org](http://www.reservesdirect.org)**

- Free, open-source software for managing course materials
- Provides advanced management tools to both instructors and library staff
- Allows users to upload almost any file format, link to web materials, and fax in documents for instant conversion to PDF
- Integrates with the library's catalog, providing convenient access to all course materials, physical and electronic, in one place
- Allows instructors to reactivate classes taught in a past semester in just a few clicks
- Can be deployed in single-library or multi-library environments and is fully "skinnable" for customized look and feel
- Is flexible enough to be implemented as a completely self-service system where instructors manage all of their own reserves materials, or as a full-service system where library staff manage everything for the instructors, or as a combination of the two
- Includes many other advanced such as team-teaching support, class crosslistings, sorting, item annotation, and the ability to export reserves lists to courseware, such as Blackboard.
