

Taking a Snapshot of the Children's Literacy Development

Phonological Awareness *What are you seeing?*

Are the children chiming in more consistently when you share rhyming stories, poems, songs, etc.?

Can the children tell you if two words rhyme or not when you say them?

Can the children make up their own rhymes?

Can the children clap syllables in two syllable words?

If you give the children a sound to listen for (e.g., /t/), and then say three words (e.g., turtle, tub, soup), can they tell you the words that start with /t/?
