Function of the catalogue

Cutter

To enable a person to find a book of which either the author, the title, or the subject is known.
To show what the library has by a given author, on a given subject, or in a given kind of literature.
To assist in the choice of a book as to its edition or as to its character.

Paris Principles

The catalogue should be an efficient tool for ascertaining whether the library contains a particular book specified by its author and title, or its title alone, or a suitable substitute for the title which works by a particular author or which editions of a particular work are in the library.
**Function of the catalogue**

Find
