Gov 2.0: Going further with the Wikinomics folks

1:30 - 3:30

Anaheim Convention Center, Room 212A

Track: Transformation & Innovation

Heard about Gov 2.0? Wikinomics author, Anthony D. Williams, refers to it as harnessing the power of mass collaboration and the web 2.0. Learn about the use of social technologies in CIA, DIA, State, NIH, GSA, DHS, and other government agencies. Discover how government is striving to behave not as an isolated department or jurisdiction, but as something new: a truly integrated organization. Meet the change agents who are bringing innovation to the bureaucracy. Co-sponsor: ALA GODORT and FLICC Libraries and Emerging Technologies Working Group

Agenda:

1:30 - 1:50 Welcome

Thank co-sponsors GODORT, FLICC LET, disclaimer, background, intro Michelle (Nancy Faget)
Slides Gov 2.0 efforts (Michelle Springer)

1:50 - 2:10 Collaboration within an Agency

Diplopedia, DipNotes, Ralph J. Bunche Library
(Tiffany Smith and Elaine Cline, State Department)

2:10 - 2:40 Collaboration across Government

Intellipedia
(Sean Dennehy, CIA)

2:40 - 3:00 Collaboration with the Public

Library of Congress & FLICKR
(Michelle Springer or Helena, Library of Congress)

3:00 - 3:15 Collaboration in Other Worlds

Federal Consortium on Virtual Worlds
(Michelle Springer, Library of Congress on behalf of NDU)

3:15 - 3:30 Q&A

Speakers - Gov 2.0

Elaine Cline is currently the Chief Librarian at the Ralph J. Bunche Library, U.S. Department of State. As the Chief Librarian she serves as the highest authority in the Department of State on matters pertaining to library service in developing, administering and operating the central library for the Department.

Ms. Cline was formerly the Assistant Library Director at the District of Columbia Public Library and has also served as the head of the National Air and Space Museum Library and the Director of the Library and Information Technology at Augsburg College in Minneapolis.

Elaine Cline is an active member of the American Library Association and is the immediate past President of the District of Columbia Library Association. She has held several leadership positions in both the Minnesota and Michigan Library Associations and has made presentations on a wide variety of library issues. She has reviewed grants for the Institute for Museum and Library Services and served on the OCLC Users Council. She received her BA degree from the College and William and Mary and a MLS from The University of Michigan.

Tiffany L. Smith is a Presidential Management Fellow who serves as the Diplopedia Project Lead at the Office of eDiplomacy within the U.S. Department of State.

Tiffany facilitates the contribution of information to Diplopedia, the Department of State's internal unclassified online encyclopedia, by working with staff throughout the Department to build portals, assist with template design, find and organize citations, and help to turn tacit knowledge into shared information. She also assists with other eDiplomacy knowledge leadership initiatives, including Communities @ State. Tiffany employs her librarian education and experience to organize information, educate and provide assistance to users, and serve as an end-user advocate in regard to information retrieval.

Tiffany received her MSLS from The Catholic University of America's School of Library and Information Science. She is a member of the American Library Association and serves as the Library and Information Technology Association blogging coordinator. She is also a member of Beta Phi Mu, the Special Libraries Association, and the American Society for Information Science and Technology.

Sean Dennehy has more than 15 years of experience in various elements of the US Intelligence Community, including the CIA's Directorate of Intelligence, DIA's Joint Staff Intelligence, and supporting US Air Force operations. As the pilot customer for Intellipedia, he has become a leading change agent for incorporating Enterprise 2.0 solutions into the Intelligence Community's business practices. He has developed an innovative "sabbatical" program that introduces Intelligence Community officers to the numerous web 2.0 applications that are being deployed on multiple intelligence networks. The focus of his efforts is encouraging a viral adoption where officers replace existing processes to take advantage of network effects encountered when individuals move projects out of "channels" and onto "platforms". His actions are based on the National Intelligence Strategy's six main characteristics: results-focused, collaborative, bold, future-oriented, self-evaluating, and innovative. Together with a small cadre of early adopters, Mr. Dennehy is helping to break down stovepipes to allow intelligence professionals to truly act as a "community".
