

**See it, Hear it, Touch it:  
How do Communication and Learning Styles Affect Virtual Reference?**

Sponsored by RUSA's RSS/MARS Virtual Reference Committee, RUSA's RSS Cooperative Reference Committee, and the ACRL Instruction Section  
American Library Association, Washington D.C., Monday, June 25, 2007  
Grand Hyatt Hotel, Constitution Room A/B, 10:30am - 12:00pm.

Our increasingly tech savvy virtual reference users have radically different communication and learning preferences. Some are most comfortable with e-mail, others prefer chat. Some crave the streamlined IM environment, others prefer to text message on their cell phones. Some like detailed instructions, others like a packaged answer. Librarians and information professionals need to offer services that meet a broad range of information needs and communication preferences. Educators increasingly need to incorporate new technologies in innovative ways to meet a variety of learning styles in both physical and virtual service points to meet the needs of their users. A lively panel of experts will explore the options, present recent research findings, and recommend approaches relevant to all types of libraries.
