A4  Public Library Services Available to Users, FY2007–2008 ...................................... 10

B1  Fiscal Year 1996–2005 Annualized Percentage Change in Public Library Operating Expenditures ..................................................... 14
B2  Percentage Change FY2007 Actual versus Anticipated Operating Expenditures ..................................................... 16
B3  Percentage Change Rural Libraries FY2007 Actual versus Anticipated Operating Expenditures ..................................................... 16
B4  Percentage Change Suburban Libraries FY2007 Actual versus Anticipated Operating Expenditures ..................................................... 17
B5  Percentage Change Urban Libraries FY2007 Actual versus Anticipated Operating Expenditures ..................................................... 17
B6  Average Percent Change Comparing Technology-Related Expenditures, FY2006–2007 ..................................................... 18
B7  Average Percent Anticipated Change Technology-Related Expenditures, FY2007–2008 ..................................................... 18
B8  Average Percent Change in Technology-Related Expenditures, FY2006–2007 ..................................................... 19
B9  Average Percent Anticipated Change in Technology-Related Expenditures, FY2007–2008 ..................................................... 19
B10  Average Percent Change in Rural Library Technology-Related Expenditures by Source, FY2006–2008 ..................................................... 20
B11  Average Percent Change in Suburban Library Technology-Related Expenditures, FY2006–2008 ..................................................... 20
B12  Average Percent Change in Urban Library Technology-Related Expenditures, FY2006–2008 ..................................................... 20
B13  Average Anticipated Percentage FY2008 Technology-Related Expenditures for All Revenue Sources ..................................................... 21
B14  Telecommunications Costs  ................................................................................. 22
B15  Average Anticipated Percentage Technology-Related Expenditures from FY2008 Non-Tax Revenue Sources ..................................................... 23

C1  Public Library Outlets and Survey Responses .......................................................... 33
C2  Average Number of Hours Open per Outlet .......................................................... 33
C3  Public Library Outlets Change in Hours Open .......................................................... 34
C4  Public Library Outlets Offering Public Access to the Internet .......................................................... 34
C5  Public Library Outlets the Only Provider of Free Public Internet and Free Public Computer Access .......................................................... 35
C6  Average Number of Public Access Internet Workstations .......................................................... 35
C7  Number of Public Access Internet Workstations by Average Age .......................................................... 36
C8  Public Access Wireless Internet Connectivity in Public Library Outlets .......................................................... 36
C9  Public Library Outlet Public Access Internet Workstations Addition Schedule .......................................................... 37
C10  Public Library Outlet Public Access Internet Workstations Replacement Schedule .......................................................... 38
C11  Public Library Outlet Public Access Internet Workstation/Laptop Replacement or Addition Schedule .......................................................... 39
C12  Factors Influencing Addition of Public Access Internet Workstations/Laptops .......................................................... 40
C13  Factors Influencing Replacement of Public Access Internet Workstations/Laptops .......................................................... 40
C14  Three Most Significant Challenges Facing Libraries .......................................................... 41
C15  Public Library Outlet Maximum Speed of Public Access Internet Services .......................................................... 42
C16  Possibility of Increasing Adequacy of Public Library Outlet Public Access Internet Connection .......................................................... 43
C17  Adequacy of Public Library Outlet Public Access Internet Connection .......................................................... 44
C18  Sufficiency of Public Access Internet Workstations .......................................................... 44
C19  Public Library Outlet Shared Wireless-Workstation Bandwidth .......................................................... 45
C20  Public Library Outlet Time Limits for Patron Use of Workstations .......................................................... 46
C21  Public Library Outlets with the Same Time Limits for Internet Workstations per Day .......................................................... 46
C22  Public Library Outlets with the Same Time Limits for Internet Workstations and Total Sessions per Day .......................................................... 47
C23  Public Library Outlets with Different Time Limits for Internet Workstations per Day .......................................................... 47
C24  Public Library Outlets with Different Time Limits for Internet Workstations and Total Sessions per Day .......................................................... 48
C25  Public Library Outlet Management of Public Internet Workstation Time Limits .......................................................... 48
C26  Public Library Outlet IT Support Sources .......................................................... 49
C27  Public Access Internet Services Critical to the Role of the Library .......................................................... 50
C28  Public Library Services Available to Users .......................................................... 51
C29  Public Library Peripherals Available to Users .......................................................... 52
Acknowledgments

Large-scale national surveys and site visits such as this involve substantial effort and support from many individuals and groups. While we cannot easily mention each individual or community, we would like to highlight the efforts of those who provided substantial assistance.

The study team wishes to express their gratitude to the Bill and Melinda Gates Foundation and the American Library Association (ALA), whose support and participation have made this study and the previous 2006–2007 study possible. Also, we thank ALA and the Gates Foundation for their assistance in securing a high survey response rate.

The study team would like to recognize the significant efforts of the state librarians, the state data coordinators, and other state library staff members. As with the 2006–2007 study, the amount of time, energy, and support the state library community invested in this study contributed directly to the survey’s response rate—we cannot thank them enough for all of their efforts.

We extend a debt of gratitude to all the public librarians who completed the survey and participated in the focus groups and site visits. Without your interest and participation, we simply would not have any data. The time you take to provide the data in this report offers valuable information for national, state, and local policymakers; library advocates; researchers; practitioners; government and private funding organizations; and others to understand the impact, issues and needs of libraries providing public access computing. The data also provide public librarians with the opportunity to advocate the importance of their library for the communities that they serve.

We also are in debt to the study’s Advisory Committee. These individuals assisted us in a number of key areas, including issue identification, question development, survey pre-testing, survey Web site development, and providing perspectives on study findings. Our thanks to Stacey Aldrich (California State Library), Nancy Ashmore (Prairie du Chien Memorial Library), Robert Bocher (Department of Public Instruction, Wisconsin State Library), Linda Crowe (Peninsula Library System), Rochelle Logan (Douglas County Libraries, CORS representative), John D. “Danny” Hales, Jr. (Suwannee River Regional Library), Christopher Jowaisas (Texas State Library), Sarah Ann Long (North Suburban Library System), Charlie Parker (Tampa Bay Library Consortium), Rivkah K. Sass (Omaha Public Library) and Patricia Wallace (Enoch Pratt Free Library).

The study team thanks Letitia Earvin and Norman Rose for their ongoing work on behalf of this study and other ALA Office for Research & Statistics projects; Sara T. Behrman for her skillful and comprehensive edits; Brian Benson for designing the project logo, book cover and other materials for this project; Karen Sheets and ALA Production Services staff for designing and laying out the book; and Jaime Greene, Chris Mefford and Chrissy Russillo for thoughtful and timely feedback on report drafts.

Finally, we thank all members of the Florida State University Information Institute staff for their help and dedication throughout this entire process; in particular, we would like to recognize Carla B. Wright, Elise Jensen and Susan Thomas for their help on this project. We also wish to acknowledge the outstanding technical support and work done by Paragon New Media in Tallahassee for developing and maintaining the survey Web site.
