You will receive 6 crates numbered Section 1 through 6. Roll each crate to the area where it will be installed. Use 2-3 people to install units.

Step 1
Open crate
Remove unit
Remove velcro packing strip—SAVEn IT IN CRATE

Step 2
Place rubber feet on the unit to floor

Step 3
Locate pivot hinge
At bottom edge, spread units into two equal parts of 5 frames each.

Step 4
Raise top half of unit to its upright position. Bottom half with rubber feet should remain on the floor.

Step 5
Position and tighten the LOCKING DEVICE

Step 6
Fan unit into the recommended configuration

Important note: Units should not be used in a straight line. Greatest stability can be achieved by incorporating one or more angles into the configuration.
Locate each crate that matches the numbered unit. Roll each crate to exhibit unit.

**Step 1**
Beginning with left side, fold unit with images face to face, then panel backs to panel backs, then face to face and finally back to back.

**Step 2**
Open locking device and slide up or down to separate top units from bottom units.
Fold top 5 units down at pivot hinge.

**Step 3**
Wrap packing strip around folded unit.

**Step 4**
Place unit in crate bottom
Lay crate flat
Cover with crate top
Note: Crate top has a handle
Secure straps
