January 19, 2022 at 8:00 – 10:00 am Central

FREE registration at: https://tinyurl.com/isldbroadband2

Please join us for a follow-up interactive, hands-on session to the "Gigabit Libraries and Beyond: Improving Broadband Access Worldwide" Webinar, held on October 19, 2021, for participants to virtually "workshop" possible approaches to localizing the toolkit for communities across the globe. Participants will engage in interactive activities including creating a network diagram, a demonstration of a WiFi stumbler, and break into groups to discuss strategies to localize the toolkit across the globe.

To prepare for the workshop, please download and review a free version of the Toward Gigabit Libraries Toolkit at http://internet2.edu/tgl and also watch the short explanatory video on the site. The recording of the original webinar is available here.
