Portfolio Concerns Going Forward

- The general economy is still expected to expand at a tepid 2.0% i.e. growth trajectory is shallow
- By historical standards this recovery is below trend. Is this the new normal?
- Expectations for another Federal government shutdown in January will weigh on the markets
- The long expected “Great Rotation” from bonds to equities is underway.
- Identifying assets that investors will want 5-10 years from now is the goal for most portfolio managers
