Literature review
PIM: Individual's conscious interaction with digital and physical information

Information Creation as a Process

Active Information Management

Future?

Student Examples:

Questions for future research:
- Is undergraduate understanding of personal information management (PIM) important to STEM higher education and students' futures?
- How can academic libraries and librarians define their work to support PIM?
- Is PIM important to learning?
- Should there be intentional PIM learning opportunities for undergraduates?
- What is the next step in digital information literacy?
