

HMD Traveling Exhibition Basic Information

The History of Medicine Division of the National Library of Medicine is pleased to provide you with this exceptional traveling exhibition. We hope that the following information will be helpful to you as you prepare for the exhibition's arrival and installation at your institution.

Harry Potter's World: Renaissance Science, Magic, and Medicine explores the world of Harry Potter and its roots in Renaissance magic, science, and medicine. In 1997, British author J.K. Rowling introduced the world to Harry Potter and a literary phenomenon was born. Although a fantasy story, the magic in the Harry Potter books is partially based on Renaissance traditions that played an important role in the development of Western science and medicine.

The exhibit consists of six free-standing graphic panels (7' H x 2-1/2' W) and is transported in two plastic wheeled graphics tubes.

Exhibition Requirements

- 1) 500 square feet of floor space (minimum)
- 2) 2 people for unpacking and set-up
- 3) Safe, secure, indoor storage for exhibition travel containers - two plastic tubes with wheels - 46" H x 17" diameter each
- 4) Avoid display of the exhibit in an area with direct sunlight.
- 5) Please use latex gloves when installing the exhibition and be sure that your hands are clean if handling the panels without gloves.
- 6) Please complete the *Exhibition Survey* within two weeks of the closing of the exhibition and return to the National Library of Medicine, Exhibition Registrar.
- 7) Please provide the National Library of Medicine with copies of any publicity, advertising, or supplemental materials that are produced for the exhibition.
- 8) If possible, a digital image of your installation would be appreciated.

Exhibition Panels

Panel 1: Title panel/Potions
Panel 2: Monsters

Panel 3: Herbology
Panel 4: Magical Creatures

Panel 5: Fantastic Beasts
Panel 6: Immortality

Exhibition Installed

Panels are numbered on the back in the lower right hand corner. Panel 1 should always be first in the display and Panel 6 should always be last. The remaining panels have some flexibility in display order, but the preferred order is Panels 1-6.

Exhibition Credit

The following exhibition credit should appear in any materials and publicity produced in association with the exhibition:

This exhibition is brought to you by the National Library of Medicine, National Institutes of Health.

What You Will Receive and What to Expect

What You Will Receive

- 1) Two plastic graphics tubes each containing three cloth cylinders and three cloth bags.

- 2) Each cloth bag contains one metal base and one collapsible rod. This makes up the panel structure.
- 3) Each cloth cylinder contains one rolled graphic panel.
- 4) The exhibition does not come with lighting.

What To Expect

- 1) Each plastic graphics tube has wheels to make it easier to transport to your exhibit space.
- 2) You should expect to spend about two hours setting up the exhibit from unpacking to complete installation.
- 3) You should have at least two people for set-up.
- 4) You should be prepared to weigh down the bases to increase stability of the panels, if necessary.
