

## Librarian Demographics from the Bureau of Labor Statistics

The Bureau of Labor Statistics provides employment information about librarians in the [Occupational Outlook Handbook](#) (OOH) and in the [Labor Force Statistics from the Current Population Survey](#) (CPS). The data in these two sources come from two different surveys. The surveys have different purposes, samples, and results. The data represented in the OOH comes from the Occupational Employment Statistics Survey. The semiannual mail survey of 200,000 employers gathers employment estimates and wages. The Labor Force Statistics from the Current Population Survey (CPS) provide the number of librarians, including age ranges, as self-reported in interviews of a sample of 60,000 households in 754 sample areas.

### Occupational Outlook Handbook (OOH)
