

Successes

I had great conversations with librarians!

At Princeton Public Library we are launching film programs in April with the platform Eventive.

Noticing sharing of the Programming Guide on various listservs.

Successful asynchronous screening! :)

Using funds to pay young leaders of color to engage on an official "Climate Action Plan" for our city

people tag themselves instagram afterwards such as picking up trash or actions following the film

choice is the magic word for screenings

Asynchronous screenings? what has that been like?

links, registration, zoom

promotion and just getting people there (especially virtually and during COVID). That's just always hard.

I also recommend Bullfrog Films for accessing environmental docs and they have an easy file sharing procedure +1

has anyone done a watch party for it?

select movies for more larger audience - youth, families

People signing up to watch but not joining in the discussion forum.

action component or interactive really helps!

Offer it on demand, and give people agency to watch it on their own time

<https://www.youthunstoppable.com/> - for teens!

Virtual Event Burnout

YES
x10000000

Main partner for the event had COVID related issues with their audience - needed to find another way to reach the desired community

Obstacles
